

EASY TEST FOR HARD WATER

Almost all water in the United States starts out as hard water. Hard water is water that contains a high concentration of dissolved minerals, primarily calcium and magnesium ions. **Check the boxes below to see if you have hard water.**

Soap scum

Difficulty cleaning

Dry skin & hair

Difficulty lathering

Scale buildup

Low water flow

Cloudy glassware

Higher bills

Stiff Laundry

If you're experiencing one or more of these issues, it might be worth considering a water softener. **See next page for Water Softener information.**
